

# ERRATA SHEET

## *Michigan Manufacturers' Guide to Environmental, Health, and Safety Regulations* *4<sup>th</sup> Edition*

---

### Chapter 2: Waste Management

- **Page 2-4:** 3rd paragraph, under "Commonly collected materials include" last bullet: it should be Chapter 2.4.9 instead of 2.4.8.
- **Pages 2-44 and 2-45:** Incorrect information pertaining to when an air permit is needed to burn used oil in space heaters or furnaces. According to R 336.1282(b)(iv) of the Michigan Air Pollution Control Rules, fuel burning equipment that burns used oil is exempt from the requirement to obtain an air permit only if the oil is **generated on the geographical site** and the equipment has a rated heat input capacity not more than **500,000 Btu/hr**. Any facility that burns used oil received from do-it-yourselfers (DIY), and any other used oil that is not generated on the geographical site, will need to obtain a Permit to Install from the Air Quality Division (AQD). Please contact the appropriate AQD District Office to verify whether or not this exemption applies to the equipment prior to installation. District office locations can be found at [http://www.michigan.gov/deq/0,1607,7-135-3306\\_3329-12306--,00.html](http://www.michigan.gov/deq/0,1607,7-135-3306_3329-12306--,00.html)

**If you have questions, please contact the Environmental Assistance Center at (800) 662-9278.**
